SUMMARY

Recent graduate with a Masters in Human-Computer Interaction seeking an entry-level UX designer position. Skilled in conducting user research, creating wireframes, and developing interactive prototypes using tools such as Sketch and InVision. Passionate about creating intuitive and user-centered designs that solve real-world problems.

EDUCATION

Master of Computer Applications

Silicon Institute of Technology

Aug 2024-May 2026

7.77 GPA

Relevant coursework: **Data Structure and Algorithms, Computer Networks, Software Engineering**

SKILLS

Technical Skills :HTML , CSS, Javascript

UX/UI Techniques: User Research, Wire-framing, Prototyping, Usability Testing

Graphics & Illustration: Branding, Icon Design, Typography, Color Theory

Version control: Git and Github

PROJECTS

Food Ordering Mobile Application – UI/UX Design (Figma) [Link](#)

- Designed a mobile food ordering application UI using Figma, focusing on user-centric design, clean layout, and intuitive navigation.
- Created complete end-to-end user flow including Splash Screen, Home Screen, Restaurant Listing, Food Details, and Checkout-ready UI screens.
- Implemented modern UI/UX principles such as visual hierarchy, consistent color system, typography standards, and component-based design.
- Designed interactive prototypes and reusable components to simulate real-world food delivery app behavior.
- Optimized screens for mobile responsiveness and usability, improving user engagement and ease of ordering.
- Followed industry-standard design patterns commonly used in food delivery platforms like Swiggy/Zomato.

Application Management System – Admin & Council Dashboard (UI/UX | Figma). [Link](#)

- Designed a role-based application management system UI using Figma, supporting Admin, Council, and Applicant workflows.
- Created login, dashboard, application status, and approval/rejection screens with clear user flows and data-driven layouts.
- Built wireframes, high-fidelity UI, and interactive prototypes following design systems and grid-based layouts.
- Optimized the UI for usability, responsiveness, and enterprise-level dashboard standards.

School Bus Tracking & Child Safety Mobile Application | Figma (UI/UX Project). [Link](#)

- Designed a mobile-first UI/UX using Figma for a school bus tracking and child safety application.
- Created screens for real-time GPS bus tracking, login authentication, and home dashboard.
- Implemented notification and alert system UI for child boarding, delays, and route updates.
- Developed child profile, bus history, and emergency support interfaces to enhance parent–school communication.

ACHIEVEMENTS

- Successfully designed user-centric UI/UX solutions using Figma, delivering intuitive, responsive, and visually consistent interfaces.
- Developed wireframes, high-fidelity designs, and interactive prototypes, improving design accuracy and reducing rework during development.
- Implemented reusable design systems and components, enhancing scalability and maintaining consistency across multiple screens and projects.
